Franklin County Motorcycle Safety

The Franklin County Motorcycle Safety Team, which consists of members from Franklin County Safe Communities, Grant Medical Center Trauma Program, The American Motorcyclist Association and ColumbusBiker.com, seeks to train the Ohio injury prevention workforce about motorcycles and motorcycle safety, educate the re-entry rider community on the necessity of proper rider training and educate Franklin County motorists about the proper means for sharing the road with motorcycles.

This will be done through a specialized training session for health educators and injury prevention program coordinators throughout the state. Additionally, the team will collaborate with existing motorcycle clubs and organizations to promote proper rider education, and they will coordinate with existing training programs to meet increasing demand.
