

# Friends of *NIOSH*

The Honorable Patty Murray  
Chairwoman, Subcommittee on Labor, Health and  
Human Services, Education, & Related Agencies  
Committee on Appropriations  
U.S. Senate

The Honorable Rosa DeLauro  
Chairwoman, Subcommittee on Labor, Health &  
Human Services, Education, & Related Agencies  
Committee on Appropriations  
U.S. House of Representatives

The Honorable Roy Blunt  
Ranking Member, Subcommittee on Labor, Health &  
Human Services, Education, & Related Agencies  
Committee on Appropriations  
U.S. Senate

The Honorable Tom Cole  
Ranking Member, Subcommittee on Labor, Health &  
Human Services, Education, & Related Agencies  
Committee on Appropriations  
U.S. House of Representatives

Dear Chairwoman Murray, Ranking Member Blunt, Chairwoman DeLauro, and Ranking Member Cole:

As Congress considers funding priorities for Fiscal Year 2023, the *Friends of the National Institute for Occupational Safety and Health (NIOSH)* strongly urges you to provide at least \$375,300,000 for the National Institute for Occupational Safety and Health in the Labor, Health and Human Services Appropriations Bill.

The *Friends of NIOSH* is a coalition of industry, labor, professional, education and scientific organizations that are dedicated to research and prevention of occupational injuries and illness and committed to the training of occupational health and safety professionals. Our broad coalition of stakeholders understands the value of research, state-based surveillance of work-related injuries and illnesses, education and occupational illness prevention from many perspectives, including the labor, academic and business communities.

NIOSH protects the nation's 163 million workers and provides the only dedicated federal investment for research needed to prevent injuries and illnesses that costs the United States \$250 billion annually. NIOSH is the only federal agency with an occupational health and safety mission. Different than the regulatory approach to safety and health, NIOSH works cooperatively with employers and employees to adapt research findings into workable solutions. NIOSH is the only federal research agency responsible for protecting the nation's workers through evidence-based solutions, and this has been critical during the COVID-19 pandemic. NIOSH has been the authority on respiratory protection—testing and certifying newly available respirators, providing guidance for employers and to the public on how to operate safely during the pandemic or reopen with appropriate precautions in place.

NIOSH supports programs in every state to improve the health and safety of workers, such as the Education and Research Centers (ERCs), the Agriculture, Forestry and Fishing (AgFF) Program, the Total Worker Health (TWH) Program, and the state occupational health and safety surveillance programs. NIOSH also has a robust research program, the National Occupational Research Agenda (NORA), which was developed to apply the tools of science to improving workplace health and safety. Additional funding for these programs would allow workers to avoid exposures that can result in injury or illnesses, improve working conditions, and provide occupational safety and health services to U.S. businesses, all critically important functions during the COVID-19 pandemic.

The health and safety of the American workforce is a shared goal of all our organizations. Many of our members are employed in high-risk occupations. Rather than accept that working requires individuals to place their health and wellbeing at risk, we believe strongly that all occupations can be made safer through research, education and training.

In order to maintain the health and safety of the American workforce, we ask that you include at least \$375,300,000 million for NIOSH in the Fiscal Year 2023 Labor, Health and Human Services Appropriations bill. Thank you for your consideration of this request.

Sincerely,
