

COVID-19/NOVEL CORONAVIRUS

APHA's Priorities During Pandemic Response

1. Evidence-based education of the public health field and the public
2. Effective advocacy to ensure resources and policies that are evidence-based to protect the public's health
3. Promoting a science-based approach to the pandemic emergency response
4. Working with others to address health inequities that can worsen or occur during the response
5. Maintaining health promotion & disease prevention for other existing health threats
