

Climate Changes Health: Clean Energy Changes Climate

Year of Climate Change and Health Webinar Series

Welcome

Natasha DeJarnett, PhD, MPH
Policy Analyst – Environmental Health
Center for Public Health Policy
American Public Health Association

Welcome

Year of Climate Change and Health

GOALS:

1. **Raise awareness** by educating members that climate change is a public health issue and not just an EH or environmental issue.
2. **Mobilize leaders** that are interested in climate change but have not started to take action

MONTHLY THEMES:

January	Kick Off
February	Climate Justice & Health
March	Clean Energy
April	Transportation & Healthy Community Design
May	Air Quality, Respiratory & Cardiovascular Health
June	Mental Wellness and Resilience
July	Agriculture and Food Safety & Security
August	Water Quality
September	Extreme Weather
October	Vulnerable Populations, Focus on Children
November	Tribal and Indigenous Health
December	Co-Benefits

Year of Climate Change and Health

AJPH Call for Papers Climate Change and Health: Research, Translation, Policy, and Practice

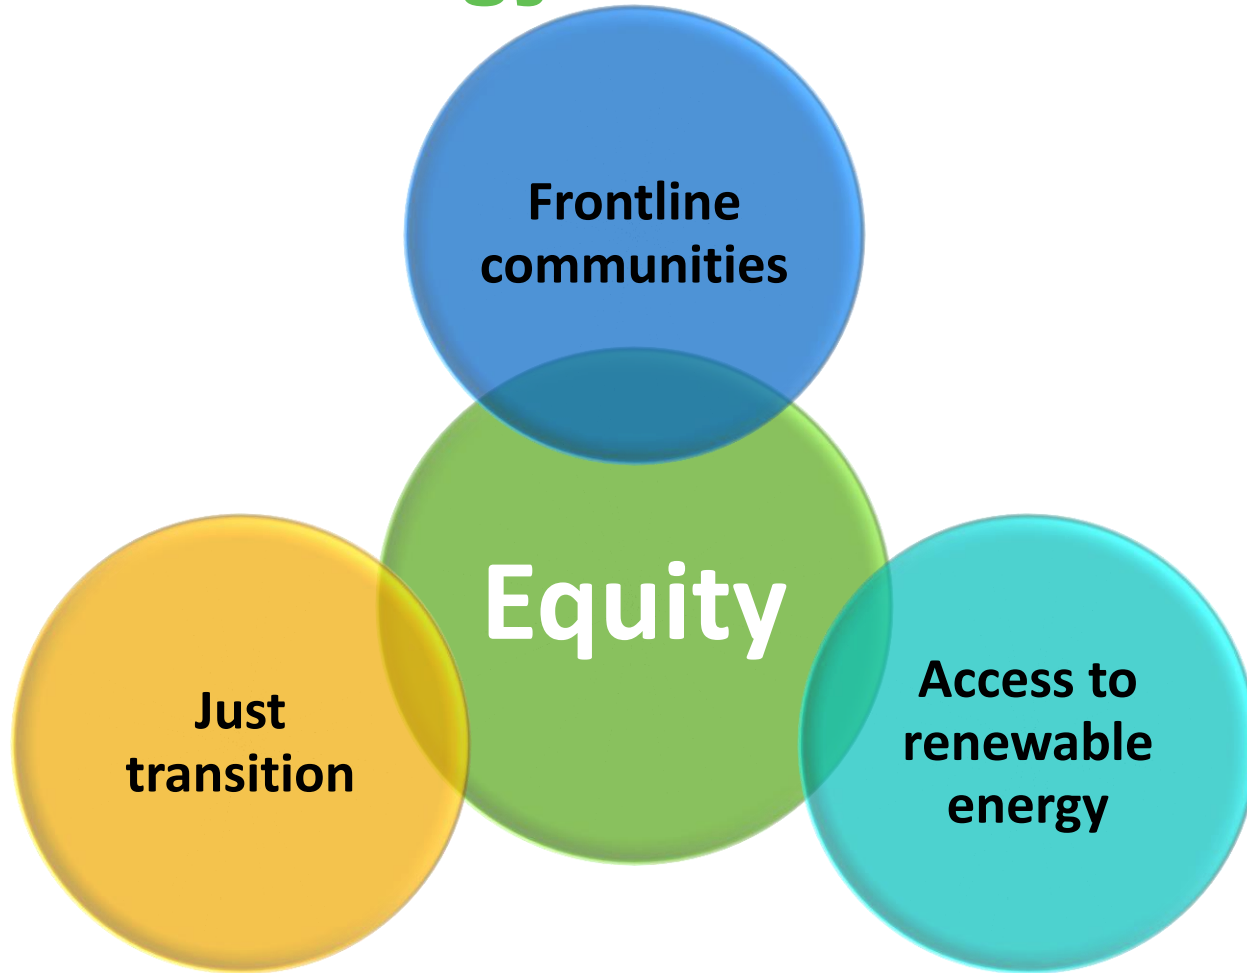

AJPH intends to publish a supplement issue on the topic of **Climate Change and Health: Research, Translation, Policy, and Practice**. Climate change is widely considered the greatest challenge to the public's health. This issue will showcase scientific research that evaluates the degree to which climate change is a present-day and future threat to population health and health equity and highlight emerging and innovative evidence, strategies, solutions, and policies to address the health and equity consequences of climate change. Original research articles, briefs, systematic reviews, commentaries, editorials, as well as analytic, photographic, and historic essays on the health and equity impacts of climate change are invited. Papers that highlight translational practices as well as evaluation or policies that demonstrate advancement of health and equity are encouraged. Topics of interest include, but are not limited to, best-practice models, co-impacts of climate change and other policies, economic evaluation, climate literacy and communication, and gaps in research, policy, and practice implications related to climate change adaptation, community resilience, and mitigation.

Potential authors should visit the *AJPH* website (www.ajph.org) to review the Instructions for Authors and specific guidelines for the various types of manuscripts. All manuscripts will undergo standard peer review by the *AJPH* editors and peer referees as defined by *AJPH* policy. Manuscripts must be submitted April 1, 2017, via the online submission system at <http://editorialmanager.com/ajph>.
