

Lisa Hoyos

*“In every crisis, **children are the most vulnerable**. Climate change is no exception. As escalating droughts and flooding degrade food production, children will bear the greatest burden of hunger and malnutrition. As temperatures increase, together with water scarcity and air pollution, children will feel the deadliest impact of waterborne diseases and dangerous respiratory conditions.*

*As more extreme weather events expand the number of emergencies and humanitarian crises, **children will pay the highest price**. As the world experiences a steady rise in climate-driven migration, children’s lives and futures will be most disrupted.”*

- UNICEF’s Executive Director Anthony Lake in their recent report
“Unless we Act Now”

CLIMATE PARENTS

SIERRA CLUB

San Jose, February 2017

Powerful Parent Influencers
