Climate Change, Public Health & Resilience Building in Maryland

Allison Gost, MPH
Prevention and Health Promotion Administration
Environmental Health Bureau
April 26, 2018

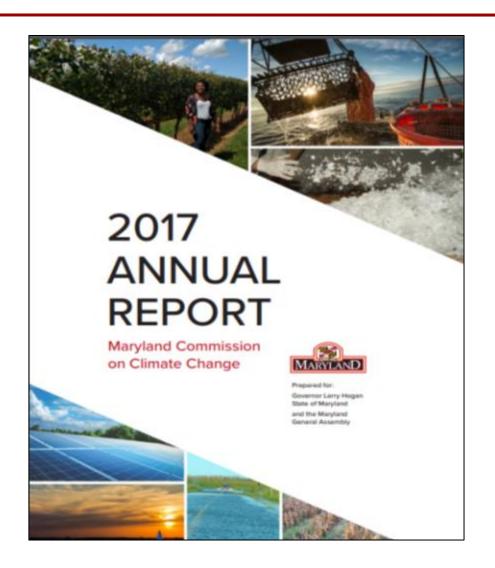

Goals for Today

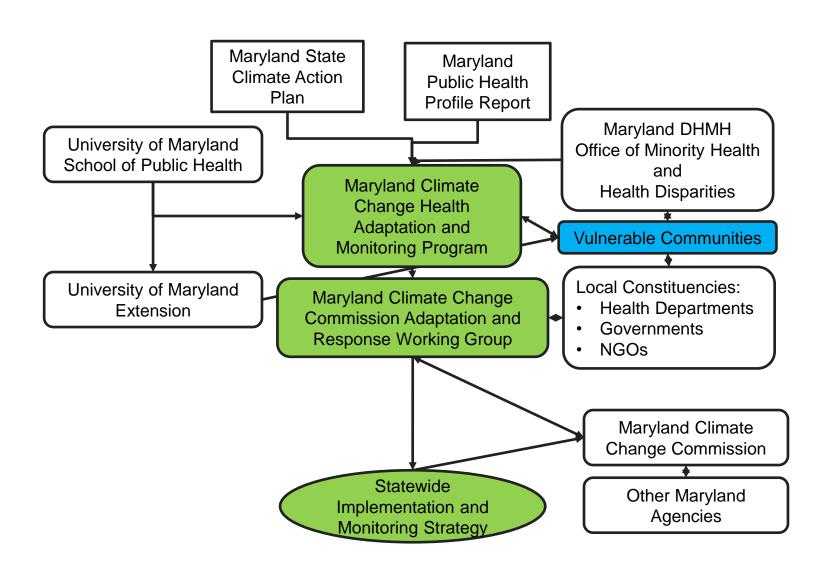

- Overview of the State of Maryland's approach to climate change
- Discuss Maryland's Public Health Strategy for Climate Change
- Highlight a selection of current activities
- Discuss intersection of community engagement, resiliency building, and sustainability

The State of Maryland and Climate Change

- Member of the Regional Greenhouse Gas Initiative (RGGI)
- Maryland Commission on Climate Change
- Joined state alliance supporting Paris climate agreement

Maryland Climate and Health Profile Report

April, 2016

Maryland Institute for Applied Environmental Health University of Maryland School of Public Health College Park

Prepared for the Maryland Department of Health and Mental Hygiene

RESEARCH TEAM

Maryland Institute of Applied Environmental Health University of Maryland, College Park

Amir Sapkota, PhD Associate Professor

Sutyajeet Soneja, PhD Postdoctoral Fellow

Jared Fisher, MPH Graduate Student

Maryland Department of Health and Mental Hygiene

Clifford S. Mitchell, MS, MD, MPH Director, Environmental Health Bureau

Steven Davis

Program Officer Centers for Disease Control and Prevention

Extreme Heat Events and Risk of Hospitalization for Asthma

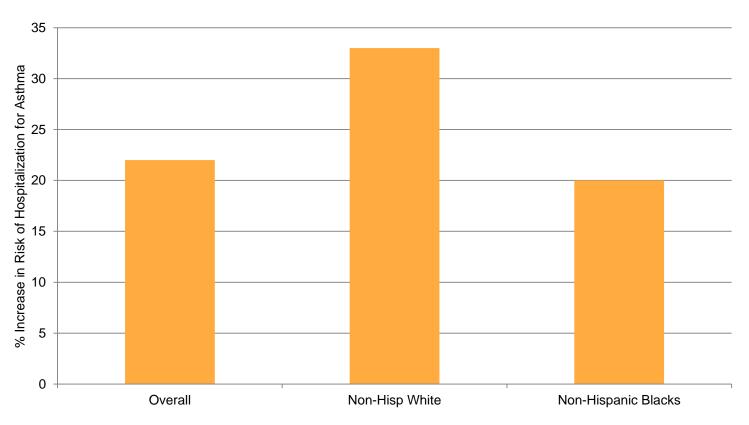

Figure 1: Odds ratio for exposure to extreme heat event and risk of hospitalization for asthma, Maryland, Years 2000 - 2012

Summertime Asthma Hospitalization Rate by County

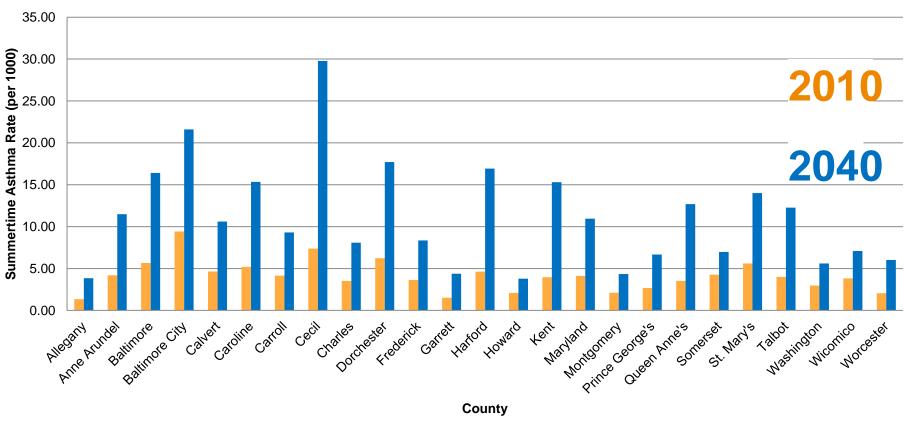

Figure 2: Observed and projected risk for exposure to extreme heat event and risk of hospitalization for asthma, Maryland

Assessing Public Health Interventions

Building Resilient Communities in Maryland: A Stakeholder Forum

Maryland's communities have many concerns about environmental impacts on their health. The School of Public Health at UMD and the Maryland Department of Health and Mental Hygiene invite stakeholders from all communities in Maryland to a one day forum regarding the effects of a changing environment and health impacts in their communities. Stakeholders and community members will discuss concerns and make connections with other communities and brainstorm on how to better tackle the task of improving health and preparing for a changing environment.

CHOOL OF

PUBLIC HEALTH

MARYLAND INSTITUTE FOR APPLIED ENVIRONMENTAL HEALTH

- Feedback loop with communities
- Engaging stakeholders with the data
- Checking our assumptions
- Adaptation planning with the population

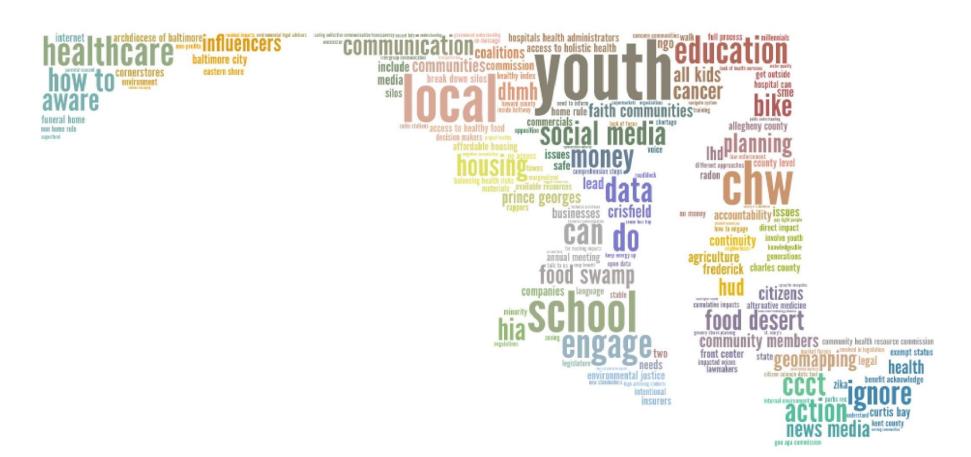

What Maryland is Doing

- Local adaptations
- Interagency engagement
- Partnership with University of Maryland
- Maryland Environmental Public Health Tracking Portal
- Maryland Commission on Climate Change

Engagement: Community Forum

Adaptation: Community Ambassadors

Educate – Engage – Empower

- Local non-profit
- Middle and high school students
- Education with direct link to action
- Student generated adaptations

Education: Shoring Up Resiliency through Education

- Interagency & interdisciplinary team
- Teacher training
- Curriculum development support
- Alignment with state education standards

Awareness: Public Service Announcements

- Partnership with the Association of Climate
 Change Officers (ACCO) & Cummings Group
- Two 60 second PSA's with target audience of youth
- Morris the Mosquito & Wheezing Wendell

Institutionalizing knowledge: Advisory Boards

- Maryland Commission on Climate Change
- Project Green Classrooms
- Envision the Choptank
- Land Preservation and Recreation Plan Technical Advisory Committee
- Climate Academy

Guiding Principles

- Horizontal and vertical partnerships
- Integration key for sustainability
- Connect climate concerns to values
- Any increase in resiliency and preparedness is an increase in climate resilience
