THE FACTS: Missouri

**Public Health Funding:** Strong investments in public health allow a state to carry out programs that improve health. Missouri receives $18.35 per person in funding from CDC (45th in the nation) and $30.91 per person from HRSA (20th in the nation). The Prevention and Public Health Fund has awarded over $58 million in grants to Missouri since 2010 for community and clinical prevention efforts and improvements to public health infrastructure.

**Access to Care:** 8.9 percent of people in Missouri do not have health insurance coverage compared with the national uninsured rate of 8.6 percent. The number of practicing health care providers is also an important measure of health care availability. Missouri has 160.4 active primary care physicians per 100,000 people. Nationally, there are 149.7 practicing primary care physicians per 100,000 people. Of concern, Missouri has 48.5 dentists per 100,000 people, ranking 10th lowest in the nation.

**Notable Health Measures**
- **Obesity:** 31.7 percent of adults in Missouri are obese compared to the national average of 29.9 percent. Obesity contributes to poor general health and is a leading factor in preventable diseases.
- **Diabetes:** In the past three years, diabetes increased 20 percent from 9.6 percent to 11.5 percent of adults.
- **High school graduation:** 87.8 percent of students graduate from high school in Missouri, ranking 10th highest in the nation. This is a notable measure as there is a strong connection between education and health. People with higher levels of education are more likely to adopt healthy behaviors.

**The Challenges Ahead**
- **Tobacco use:** 22.1 percent of adults smoke cigarettes in Missouri, ranking the state 8th highest in the nation. Each year, 11,000 people die from smoking-related illnesses in Missouri and $3 billion is spent on health care costs due to smoking.
- **Violent crime:** In 2017, there were 519 offenses per 100,000 population in Missouri, which is the 8th highest rate of violent crime in the nation. Violent crimes may cause injuries, disability and early death. Additionally, violent crimes may cause long-term stress for families and communities, and interfere with leading a healthy lifestyle. However, violent crime can be prevented. Numerous programs and practices have shown that by addressing root causes it is possible to prevent violence.
- **Excessive drinking:** Adults in Missouri reporting excessive drinking increased by 21 percent in the past two years, from 16.1 percent of adults in 2015 to 19.5 percent of adults in 2017. Excessive alcohol use can lead to fetal damage, liver diseases, high blood pressure, cardiovascular diseases and other major health problems.
