THE FACTS: West Virginia

Public Health Funding: Strong investments in public health allow a state to carry out programs that improve health. West Virginia receives $25.85 per person in funding from CDC (18th in the nation) and $51.00 per person from HRSA (3rd in the nation). The Prevention and Public Health Fund has awarded over $38 million in grants to West Virginia since 2010 for community and clinical prevention efforts and improvements to public health infrastructure.

Access to Care: 5.3 percent of people in West Virginia do not have health insurance coverage, which is well below the national uninsured rate is 8.6 percent. The number of practicing primary care physicians is also an important measure of health care availability. West Virginia has 159.6 active primary care physicians per 100,000 people, which is above the national average of 149.7 practicing primary care physicians per 100,000 people.

Notable Health Measures

- **Infectious diseases:** West Virginia has the lowest rate infectious disease in the nation, based on rates of pertussis, chlamydia, and Salmonella.
- **Excessive drinking:** The state has the lowest rate of excessive drinking with 11.8 percent of adults having reported drinking excessively.

The Challenges Ahead

- **Drug deaths:** In the past year, drug deaths increased 10 percent from 32.2 to 35.3 deaths per 100,000 people. This is the highest death rate due to drug injury in the nation.
- **Tobacco use:** 24.8 percent of the adult population smokes in West Virginia. This is the highest rate in the nation. Each year, 4,300 adults die from smoking-related illnesses in West Virginia and $1.0 billion is spent on health care costs due to do smoking.
- **Obesity:** The state has the highest adult obesity rate in the nation with 37.7 percent of the adult population obese. Obesity contributes to poor general health and is a leading factor in preventable diseases.
