

THE FACTS

# KENTUCKY

**Speak**  
for **Health**

AN INITIATIVE OF THE  
AMERICAN PUBLIC HEALTH ASSOCIATION

**PUBLIC HEALTH FUNDING** Strong investments in public health allow a state to carry out programs that improve health. Kentucky receives \$108 total per person from the Centers for Disease Control and Prevention (CDC) and the Health Resources Services Administration (HRSA) dedicated to public health. In fiscal year 2023, the Prevention and Public Health Fund awarded Kentucky about \$6.84 million in grants for community and clinical prevention efforts and improvements to public health infrastructure.

**ACCESS TO CARE** 5.4 percent of people in Kentucky do not have health insurance coverage, which is well below the national uninsured rate of 7.9 percent. The number of practicing primary care providers is also an important measure of health care availability. Kentucky has 317.1 active primary care providers per 100,000 people, which is well above the national average of 283.4 practicing primary care providers per 100,000 people.

## Notable Health Measures

- **High school graduation** 90.1 percent of students graduate from high school in Kentucky, ranking 4th highest in the nation. This is a notable measure as there is a strong connection between education and health. People with higher levels of education are more likely to adopt healthy behaviors.
- **Homicide** Kentucky reports 8.4 homicides per 100,000 population, above the national average of 7.6 per 100,000 population.

## The Challenges Ahead

- **Obesity** 37.7 percent of adults in Kentucky are obese, ranking 9th highest in the nation. Obesity contributes to poor health and is a leading factor in preventable diseases.
- **Diabetes** The current diabetes rate is 14.8 percent of the adult population, ranking the state 5th highest in the nation.
- **Drug deaths** Kentucky reported 50.3 deaths due to drug injury per 100,000 population, ranking the state 6th highest in the nation.
- **Tobacco use** 17.4 percent of adults reported smoking regularly in Kentucky, compared to the national average of 12.1 percent.
