

THE FACTS

# KANSAS

**Speak**  
*for* **Health**

AN INITIATIVE OF THE  
AMERICAN PUBLIC HEALTH ASSOCIATION

**PUBLIC HEALTH FUNDING** Strong investments in public health allow a state to carry out programs that improve health. Kansas receives \$95 total per person from the Centers for Disease Control and Prevention (CDC) and the Health Resources Services Administration (HRSA). In fiscal year 2023, the Prevention and Public Health Fund awarded Kansas over \$4.84 million in grants for community and clinical prevention efforts and improvements to public health infrastructure.

**ACCESS TO CARE** 8.4 percent of people in Kansas do not have health insurance coverage, ranking the state 33rd in the nation. The national uninsured rate is 7.9 percent. The number of practicing primary care providers is also an important measure of health care availability. Kansas has 300.9 active primary care providers per 100,000 people, above the national average of 283.4 practicing primary care providers per 100,000 people.

## Notable Health Measures

- **Drug deaths** Kansas reported 25.7 deaths due to drug injury per 100,000 population, ranking the state 14th lowest in the nation.
- **High school graduation** 89.1 percent of students graduate from high school in Kansas, which is slightly above the national average of 86.6 percent. People with higher levels of education are more likely to adopt healthy behaviors.

## The Challenges Ahead

- **Obesity** 35.9 percent of the Kansas population is obese, which is higher than the national average at 34.3 percent. Obesity contributes to poor general health and is a leading factor in preventable diseases.
- **Food insecurity** Kansas ranks 17th lowest in the nation for food insecurity rates, with 10.6 percent of households unable to provide adequate food for one or more members.
